December 10, 2007

Honourable Kathleen O. Wynne
Minister of Education
900 Bat Street, 22nd Floor
Mowat Block
Toronto, ON M7A 1L2

Dear Minister Wynne,

I had the pleasure of attending a young inventor's exhibition, hosted by the Inventor's College Organization, in Waterloo, Ontario on November 24, 2007. The inventions and knowledge base exhibited by the young inventors was truly remarkable.

Inventors College has prepared a series of workshops to motivate and show participants how to be innovative thinkers and professional inventors. Inventing Workshops are for elementary and secondary school students, inventing groups/associations, and corporation/business staffs. The participants are taught the steps in inventing something new and how to present themselves and their inventions to potential investors and the world marketplace in a professional manner. Inventors College Workshops develop and promote individual creativity, entrepreneurialism, and positive risk-taking for personal and financial rewards through inventing. Inventors College main objective is to make inventing as real an experience as possible.

Inventors College has presented their workshops to some Toronto schools. Ultimately they would like to have their workshops presented in all Ontario schools.

I respectfully request that you or a delegate arrange a meeting with representatives from the Inventors College to further discuss the merits of their program. They can be reached at:

Otto Schmidt, Director / Instructor
Inventors College Organization Workshops
