(for regular classes, gifted, at risk, underachieving, alternative ed. students)

Your Students Become REAL Inventors/Innovators

- Week 1.** Introduction / How Things Work / Finding an Invention / Market & Patent Searching
- Week 2.** Improving Invention Ideas / Drawing & Design / Prototyping
- Week 3.** Presenting Professionally / Improving Problem-Solving Skills
- Week 4.** Researching & Studies / Protecting Inventions / Business Plans
- Week 5.** Designing Advertising & Displays / Exhibition Preparation / What to do After the Exhibition

BONUS SATURDAY! Inventions Exhibition

REAL Benefits to Students and the School

- Lessons are highly interactive, exciting, & create a passion for entrepreneurialism.
- Students improve higher-level thinking, creativity, communication & innovation skills.
- Subjects are integrated into lessons e.g. History, Science, Business, English.
- Inventors pitch to REAL investors & business owners at the Inventions Exhibition.
- Graduated inventors can participate in future Great Canadian Inventions Shows!
- Companies provide gifts & special offers to all the young inventors.
- The hosting school shares in proceeds from the Inventions Exhibition.

"My son had the wonderful experience of attending your very thorough and inspirational Inventors College workshop through his school program. Your step-by-step instructions, support and encouragement inspired him to create an invention that has sincere potential. In fact, it has garnered him several interested investors along with much media attention including a feature spot on a new kid inventors TV show..."
O. C., mother, Brantford, ON

"I just wanted to thank ICO for teaching us at the young inventors workshop. I learned so much. Most of all it was fun and well organized. This experience will surely stay with me for the rest of my life." **G. A., student, Brantford, ON**

"...I had the distinct pleasure of attending the Inventors College Workshop in Waterloo. The high quality products displayed there were truly remarkable. I am very impressed with the Inventors College mission to motivate and show participants how to be innovative thinkers and professional inventors. ...Congratulations to Inventors College for conducting world-class educational work-

"...a practical and synergistic approach that adds value to lives...My work focuses on improving the status of women...(this can be) their pathway to become inventors, entrepreneurs or business owners...their children will benefit and can also be involved...bring value and wealth within any country by enabling the social and knowledge foundation to support the business creation process."

Almas Jiwani, President, UN Women National Committee Canada

"Thanks to all who were involved in the Young Inventor's Workshops...I am especially proud of the instructors for being so supportive during and after the workshop. Seeing my 9 year old coming home with her business folder and talking about putting her business plan together and going online to research was just unbelievable..."

T. I., mother, Brantford,
